HOW SAFE IS THIS?

Extended litter pickers can be very capable of picking up needles from the floor, however trying to place these needles at arms length into a small aperture of a small sharps container in the opposing hand is extremely hazardous and can result in contaminated prick injuries.

HOW CLOSE IS THIS?

Small forceps are equally not designed for this purpose. Their small contact points provide a loose, unsecure grip; especially whilst holding an object like a syringe. With poor grip and close proximity to the potential infected sharp this is simply not safe.

CONTROLLED, SAFE DISPOSAL

These easy to handle forceps are designed with a large contact area to control and safely handle the sharp object, offering a much lower risk of injury. The 'Teeth' design allows for the safe handling of almost any small object which may put us at risk.

Why make it complicated?

Introducing Reliance Medicals' efficient, simple stepped approach to biohazard control. Everything required to clean up, contained in one simple pack - simple to grab, simple to use, simple to destroy...

BIOHAZARD BODY FLUID CLEAN UP KIT

1. PROTECT
2. SPRINKLE
3. CLEAN UP
4. DISINFECT
5. DESTROY

1 SINGLE APPLICATION CONTAINS:

- 1 Disinfectant Spray (8ml)
- 1 Absorbent Granules (10g)
- 1 Disposable Gloves (pair)
- 1 Polythene Apron
- 1 Scoop/Scraper
- 2 Dry Wipes
- 1 Biohazard Bag
- 1 Disinfectant Wipe
- 1 Pack Tissues (10)

This kit contains 5 single application clean-up packs, for the safe handling, containment and disposal of infectious micro-organisms contained in blood, vomit, urine, mucus, faeces and semen. Meets the current Health and Safety requirements.
